Recommendations to protect Wegovy while launching CagriSema

Driving CagriSema Adoption: From Provider to Patient

- U.S. has less than 1% obesity medicine specialists.^[1]
- LillyDirect provides an online platform, directly connecting providers and patients.

Current Status

- 63% of patients starting Wegovy/Zepbound in Q1 2024 persisted after 1 year.^[2]
- Only 14% were still taking Wegovy in longer-term.

- PCPs show hesitancy for CagriSema's complexity.
- Potential more PA burden pushes PCPs back to existing Wegovy/Zepbound

Risks

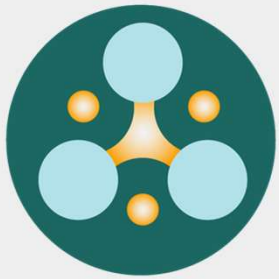

- Higher price of CagriSema create immediate affordability crisis.
- Patients may be concerned for side effects.

- Negotiate simplified PA pathways with EMR template integration.
- Launch KOL board and accredited CME programs

Actions

- Launch "CagriSema Connect" to provide virtual assistance and education for patients.
- Establish partnerships with local communities center.
